Purchase online Select online store and you will be redirected Available in {0} online store'.format (ctrl.counter) Available in {0} online stores'.format (ctrl.counter) Local dealers Find a brick and mortar dealer quickly and easily using our Dealer Search Go to Dealer search function Festool FS Guide rails are available in eight different lengths from 32 inches to 197 inches (800 - 5000 mm), providing the right rail for each application. The integrated splinterguard is perfectly aligned to your cut line, saving time and serving as protection against tears, on cuts both with grain and across. The rail guide can be easily connected with the help of an accessory guide rail connector for a hard, safe and continuous connection. Rail guides make it easier to work by taking the tool to work, and save time and money by eliminating laborious measurements, recycling and wasted material. Connect the rails with Festool Guide Rail Connectors to make limitless cuts. Use the FS 2700 Rail Guide (106 inches) with the Festool TS Plunge to cut the saw to make precision cuts up to 100 inches long. Integrated splinterguard serves as a cut line and prevents tear and splitting of a fully integrated system, use Festool routers or puzzles with guide rail for enhanced non-skid capability, dual-clip rubber bands prevent movement during cutting operations, saving significant time using the technical specifications of The Boot Accessories to keep your cutting or finishing tools in the right direction with high-quality guide systems available from the online store. Festool is one of the world's most popular manufacturers of professional cutting, grinding and polishing equipment. In fact, we have invented the rail guide to make the use of our equipment easier, so we appreciate the need for reliable guides to use with your equipment. A well-done guide can be the difference between a flawlessly straight cut and a jagged edge, so we've created a number of guides to keep your work on the straight and narrow when you use Festool equipment. Our guide rail can be 800 to 5000 mm long and have several innovative features. The zero game guide allows you to change the jaws on round saws without the need for tools. Splinter guards protect users from injuries when using their tools, and the rail guide and combination of coil make diagonal incisions much easier. We also offer a guide system with a range of holes if necessary. These holes are placed at 32 mm intervals to accommodate standard pin furniture mechanisms and are an ideal tool for furniture assembly projects. Our guides can be combined to create a variety of And are also designed to be used with a variety of Festool accessories. With options including combined cots, fastening clamps, double suction pads and parallel side fences, you can customize the guides to suit the task at hand.
